

Pulse Shib LitePaper

A meme coin built to dominate all dog coins.

Meme coins like Dogecoin, Shibainu and Floki inu currently have a combined market cap of over \$45 billion. Meme coins have been one the best performing niches in crypto. We believe the meme coin mania is here to stay however most meme coins are destined to fail. That is because most meme coins have no fundamentals. To quote Richard Heart “most meme coins have no technical innovation. Their claim to fame is just a logo”.

Our goal is to build the best meme coin the world has ever see one that combines the best of all things crypto. A combination of a beautiful logo, tokenomics and fundamentals. So we are taking everything that made meme coins popular and adding fundamental. We believe that’s what will create long term sustainability and will ink Pulse Shib in the crypto history books.

Tokenomics

Total supply	1 000 000 000 000
Community Airdrops and competitions	100 000 000 000
Marketing and Dev Team	200 000 000 000
PulseShib origin wallet	100 000 000 000
Sacrificers	500 000 000 000
Initial liquidity	100 000 000 000

Community Airdrops and competitions

This is to help jumpstart the Pulse Shib meme machine.

Marketing and Dev Team

The vision of Pulse Shib is to have long term sustainability. That'll require long term marketing and development.

Pulse Shib origin wallet

A special wallet created after Pulseshib is launched.

Initial liquidity

Initial tokens released on the after the Pulse Chain launch

Sacrifice

This is how we determine which wallets gets the early access to 50% of the PulseShib tokens.

What is sacrificing

Sacrificing is a political statement that says I believe the Pulse Chain is the future of web3. Pulseshib is being created to drive adoption to the #PulseChain. Sacrificers will be awarded with Pulse Shib a PRC20 on the Pulse Chain.

How do you sacrifice

Sacrificing is simple. simply sacrifice by sending Ethereum, Usdc & Hex to the Ethereum addresses specified on pulseshib.com
Make sure you have the correct address. If you sacrifice to a wrong address, you will not get PSB.

Road Map

We hope to build tools that will advance the adoption of the Pulse Chain. These tools may include NFTs, Games and support to any Pulse Chain start-up.

These objectives could be achieved with Decentralised Autonomous Organisation (DAO) which consist of Pulse Shib token holders. The purpose of the DAO could be to pursue community goals.

Conclusion

We believe Pulse Shib is the beginning of a journey that will stand the test of time. That will grow organically. The success of Pulse Shib depends on us the community. The ball is in your court. Let the SHILLING BEGIN.
